

IN THE CLAIMS:

Please cancel claims 1-32, 36-38 and 46-54 without prejudice. Please amend claims 33, 35, 39 and 45. Please add new claims 55-71. A listing of all claims and their status as of this Amendment is set forth as follows:

1-32. (Canceled)

✓ 33. (Currently Amended) A method of administering an analgesic comprising ~~mixing~~ applying an analgesic ~~within in~~ a fluid, film-forming carrier, ~~applying said mixture as a fluid~~ onto the skin, whereby said film-forming carrier containing said analgesic hardens to a tangible membrane juxtaposed to the skin surface, which tangible membrane can be peeled off the skin either at completion of administration or to apply a subsequent dose of the analgesic in the film-forming carrier.

✓ 34. (Original) The method of claim 33, wherein said analgesic is a topical anesthetic.

✓ 35. (Currently Amended) The method of claim 33, wherein said ~~analgesic is transdermally administered parenterally~~ film-forming carrier further contains Benadryl® (diphenhydramine HCL).

36-38. (Canceled)

✓ 39. (Currently amended) A method of providing an ~~internal physiological effect~~ active ingredient to a mammal comprising ~~mixing~~ applying an active ingredient,

**having capable of providing an internal physiological effect, ~~within~~ in a film-forming carrier ~~to form a fluid mixture, applying said fluid mixture~~ to the skin of said mammal, ~~said fluid, film-forming carrier containing said active ingredient, whereby said film-forming carrier hardening~~ hardens to a tangible membrane juxtaposed to the skin, which tangible membrane can be peeled off the skin either at completion of administration or to apply a subsequent dose of the active ingredient in the film-forming carrier.**

40. (Original) The method of claim 39, wherein said active ingredient is a vasodilator.

41. (Original) The method of claim 39, wherein said active ingredient suppresses drug-addictive cravings.

42. (Original) The method of claim 41, wherein said active ingredient is nicotine.

43. (Original) The method of claim 39, wherein said active ingredient is a bronchial dilator.

✓ 44. (Original) The method of claim 39, wherein said active ingredient is an antihistamine.

✓ 45. (Currently amended) The method of claim 44, wherein said antihistamine is **benadryl Benadryl® (diphenhydramine HCL)**.

46-54. (Canceled)

*N* 55. (New) The method of claim 39, wherein the active ingredient is effective for treatment of atopic dermatitis.

*N* 56. (New) The method of claim 39, wherein the active ingredient is effective for treatment of insect bite.

*N* 57. (New) The method of claim 39, wherein the active ingredient is effective for treatment of a plant toxin.

*N* 58. (New) The method of claim 57, wherein the active ingredient is effective for treatment of poison ivy.

*N* 59. (New) The method of claim 39, wherein the active ingredient is effective for treatment of scars or healed wounds.

*AI*  
*Cond*  
✓ 60. (New) The method of claim 56, wherein the active ingredient comprises an analgesic.

✓ 61. (New) The method of claim 60, wherein the analgesic is a local anesthetic.

✓ 62. (New) A method of treating an adverse skin condition comprising administering a composition with an active ingredient capable of providing an internal physiological effect in a film-forming carrier to the skin of a mammal, wherein the active

ingredient comprises a topically active steroid, topically active antihistamine, topically active analgesic, silicone gel, an enzyme, a vitamin or a mixture of two or more of said active ingredients, and wherein said film-forming carrier hardens to a tangible membrane juxtaposed to the skin, which tangible membrane can be peeled off the skin either at completion of treatment or to apply a subsequent dose of said composition.

✓  
63. (New) The method of claim 62, wherein said active ingredient is a topically active antihistamine.

✓  
64. (New) The method of claim 63, wherein said topically active antihistamine is Benadryl® (diphenhydramine HCL).

✓  
65. (New) The method of claim 62, wherein the active ingredient is effective for treatment of atopic dermatitis.

✓  
66. (New) The method of claim 62, wherein the active ingredient is effective for treatment of insect bite.

✓  
67. (New) The method of claim 62, wherein the active ingredient is effective for treatment of a plant toxin.

✓  
68. (New) The method of claim 62, wherein the active ingredient is effective for treatment of poison ivy.

✓  
69. (New) The method of claim 62, wherein the active ingredient is effective for

treatment of scars or healed wounds.

✓

70. (New) The method of claim 62, wherein the active ingredient comprises an analgesic.

✓

71. (New) The method of claim 70, wherein the analgesic is a local anesthetic.
